

# Client-Side Technologies

## JavaScript Fundamentals Day7

1-Create a simple form with Add and Reset buttons takes user's information (name age and email) with validation for each field and all fields are required.

Every time the user enters a right data and press Add button the data is displayed in the table as shown in fig 3

Name:

Age:

E-mail:  this field is required

Name	Age	E-mail
------	-----	--------

Name:

Age:

E-mail:  Not a valid e-mail address

Name	Age	E-mail
------	-----	--------

Name:

Age:

E-mail:

Name	Age	E-mail
menna	23	aaa@aol .aaa
hamada	26	bbb@aa .aaa

2-Photo gallery with Next, Previous and Slideshow.

- Next goes to next pic and stops when reaching last image
- Previous goes back to previous image and stops when reaching first image
- Slideshow will circulate, i.e. when reach last image is should continue displaying staring from first image
- Stop will stop slideshow behavior.
- Let the delay between every to image lasts 2 seconds

### Showing pics

[Next](#) [SlideShow](#) [Stop](#) [Previous](#)

### Bonus:

3- Create an animation on the page that makes an orange marble move to the next location in the line every second. Allow the user to stop the animation by placing the cursor on any marble. The animation will restart again once the user removes the cursor from that marble. Add your own interesting feature to the script that tinkers with the speed or location of images
